DEMONSTRATION**

This is a basic demo of how the Brother Scan n Cut machine works. This is the second of our Scan n Cut machines. The first one had issues and resulted in the sticky mat getting caught in the corner. This turned out to be a fault in the machine. Brother replaced it with a new machine and we have had no problems since.

The second machine works a lot better as you can see in the video.

Watch the video below to see a demonstration of the Brother
