

Shape Cut Pro Review and Demonstration

We love using jelly rolls, charm packs and any sort of pre-cuts really, so when we saw the Shape Cut Pro, we knew we needed to get one. Our only problem was that they are difficult to find in Australia and therefore quite expensive. So we went searching and eventually purchased one through fishpond.com.au. It was a lot cheaper and there weren't any postage costs to worry about.

The Shape Cut Pro is basically a big ruler that allows you to cut jelly roll strips, charm squares and layer cake squares with ease and super fast. We love it.

It has grooves cut into the ruler where you insert your rotary cutter. This basically means that you get straight perfect strips every time. We use it to cut 2 1/2 inch strips, 5 inch squares and 10 inch squares.

Where Can You Buy the Shape Cut Pro?

- Official Website
- Amazon
- Punch With Judy (Australia)
- Fishpond (Australia)
