

Sizzix Big Shot, Die Cutting and Embossing Machine, Unboxing

SIZZIX BIG SHOT UNBOXING

alandacraft.com

One of our recent purchases was the Sizzix Big Shot die-cutting and embossing machine. We had heard a lot about the Sizzix when we were looking for a machine that would cut out multiple layers of fabric precisely and easily. The Sizzix Big Shot certainly fits the criteria. It works on paper, fabric, card stock and many other materials.

The video below shows what comes in the box.

We will be adding more video tutorials on using the machine in the near future. Can't wait to get started using the Big Shot for our fabric appliqués etc.

The Sizzix Big Shot can be purchased from Amazon.com and for those of you living in Australia you can get a great deal from CraftOnline.com
