

# How to Update Your Brother Scan n Cut

Many ScanNCut owners don't realize that every now and then their Brother Scan n Cut needs updating. This is because Brother introduces new software with new features or fixes. When this happens, you need to upload the software to your machine.

In this video, we go through the steps on how to do this. It's pretty simple but you will need a USB stick in order to do it as you cannot directly connect the Brother ScannCut to your computer.
