

# How to Adjust the Screen on Your Brother Scan n Cut Tutorial

We were finding that at times nothing happened when we clicked on the screen on the Brother Scan n Cut and we thought that the machine wasn't working as the pointer had to be off to the side to allow us to make a selection. Well, we found that this was happening because the screen had moved out of alignment.

It's easy to do and will it set your mind at ease knowing it's something that is so simple to correct.

**Watch the video tutorial below to see how to adjust the screen**
