

Silhouette Cameo V2 Unboxing

**SILHOUETTE
CAMEO**

UNBOXING

alandacraft.com

Today we decided to get a new toy for the craft studio...the Silhouette Cameo V2. We've been wanting one for a while now and found a store (Craft Giraffe) that price matched the cheapest price we could find for the Silhouette here in Australia. I have to say that the staff there are just lovely...extremely helpful and willing to chat.

As many of you know, we have the Brother Scan n Cut and have created numerous videos on how to use it, but we have never tried the Silhouette Cameo. It is a very similar machine in many ways but we knew that there were enough differences for us to check it out thoroughly.

We are really excited and looking forward to creating lots of tutorials for it much like we do for the Brother Scan n Cut.

We have read the quick start guide and plan to heavily research and test out the machine over the next few days so stay tuned.

This first video is just a simple unboxing so you can see what's included.
