

How to Convert SVG Files to Brother Scan n Cut FCM Files

In this video we show you how easy it is to convert svg files to the fcm files. The fcm files are the type of file that is required by your Brother Scan n Cut.

Brother uses it's own format for ScannCut files, if you want to use SVG files you need to convert them first. To do this you need to use the Brother Scan n Cut Canvas software. It's a free online tool and converting files is quick and easy.

Brother Canvas Workspace →
