

# How to Use Your Own Fonts with the Brother Scan N Cut Type Converter

UPDATE: This feature is no longer needed as Brother has introduced new downloadable software called Canvas Workspace that allows you to use the fonts on your computer. You can download the software from the Brother ScanNCut site [here](#).

Brother recently introduced a new feature that allows you to use fonts on your computer and convert the words that you create to cutting files. It's a piece of software that you load onto your computer and you can type in words using and then save them to an FCM file which can be read by your ScanNCut machine.

## Watch the video tutorial below

This video takes you through the step-by-step process on how to set up the software and how to create words using your own fonts and save them to cutting files.
