

# Brother Canvas Workspace Tutorial: Folding Gift Tag

Those of you who have been watching our ScanNCut videos for a while now will know that we have already recorded a video for this Folding Gift Tag. However, Brother has since introduced the new PC based software version of Canvas Workspace, so we felt another video was needed for all of you who are using the new software.

This is a really neat folding tag and once you have designed it, you can save the cutting file and use it again and again for all sorts of occasions. They really dress up your gifts. And you can personalize them so that they are unique to the person receiving them.

You can also add them to your scrapbooking projects and art journals for added interest on your page.
