

# Readers Project: Carol's Family Love Wooden Plaque

*Note from Alanda Craft:* You can make so many great projects using your ScanNCut. Carol's 'Family Love' plaque shows just how versatile your machine is. It cut's vinyl with ease making it ideal for decorating and embellishing your projects. I have used vinyl and my ScanNCut to make labels for spaghetti containers, decorate notebooks and many other projects. Carol has taken this one step further by turning an unfinished wood plank style plaque into a fun family sentiment. Thank you for sharing your project with us Carol. I really like what you have done, your plaque looks great and will obviously take pride of place in your home.

## Carol Says:

I made this on an unfinished wood plank style plaque from Park Lane (JoAnn Fabrics) and Oracle permanent vinyl cut on my ScanNCut CM350. I also created my own stain from mixing and diluting acrylic paint.

**Watch the video below to see how to use your ScanNcut to cut Vinyl.**
